

Mooresville Christian Academy
Board Report
February 2020

Exciting things going on at MCA:

1. Open house went well - around 10 families were there.
2. We finished up closed enrollment on Friday. Open enrollment starts on Monday. Mrs. Friel is coming in on Monday to take open enrollment applications and finalize our re-enrollment numbers.
3. Busy month with activities before spring. Pasta to Performance brought in over 200 people to watch the talent of our students. STEM night for elementary had around 30 families. We think Micah is going to run a STEM camp this summer along with our sports camps.
4. 8th grade went skiing and Spanish I and II went to a Mexican restaurant for lunch. Mr. Gilead provided a bus.
5. We have started our ACSI accreditation, so this is a lengthy process that we will work through.
6. MCA auction is Saturday - please get your tables.
7. I have the schedule made for next year, and students will be filling out their classroom requests.
- 8.

PTF: Parent Teacher Fellowship:

They are doing a Thursday treats for the staff through January and February. It has been wonderful.

Staffing:

Mark Petty is doing a great job, and I think the transition has gone well. Megan Dowden and Aaron Lawson are helping him transition with Powerschool and policies.

Curriculum:

I think the updates in the curriculum are working. NWEA shows growth in our students as we get ready for ILEARN testing in April/May.

The ILEARN schedule is done, so we test at the end of April and beginning of May. We will probably continue with the same publisher in the subject matters as we add high school classes.

Cash Flow:

We are enrolling another 3 students starting on Tuesday. With the addition of the ones at Christmas, the extra cash is helpful. The first payroll in March should be easy to make, but the second one on the 27 might need to borrow some money from the line for a couple of days before we get our School Choice check.

School Safety:

We ran our intruder drill, and it went well. We will be running the tornado drill during national tornado week.

Athletics:

1. Working on creating high school sports teams next year.
2. Golf and Track will start right before spring break

Eagles Soccer Club - Registration is up and we have started advertising. This community event goes from April -- May.

Technology:

Good - updating our phones so we can have bells again.

Student Discipline: A few instances that we are taking care of.

Facilities:

Nothing major is going on with our present facility.

Future expansion:

1. We are planning on excavating the fields for softball and baseball fields during the summer/fall.
2. I received a bid which I want to accept. \$4,500 topographical map, \$22,000 for designs and permitting, \$5000 a month to get bids, discuss with us and manage the project.
3. This dirt moving would get us the infrastructure to start the academic wing next year.

Things that Need Done:

1. I will be working on staff raises for the 20-21 school year.
